

II. AMENDMENTS TO THE CLAIMS

The following is a courtesy copy of the currently pending claims; no revisions have been made via this document:

1. (Previously Presented) A fixture system comprising:

a base having at least one set of support brackets;

a first support member, adapted for connection to at least one of the support brackets, wherein the support member includes a shaft having a threaded coupling joined thereto;

a first connector, extending through one of the set of support brackets and the shaft, for securing the support member to the one set of support brackets;

a rod having a first end and a second end, wherein the first end is coupled to the coupling;

and

a housing including a housing coupling, wherein the second end of the rod is coupled within the housing coupling, and wherein the housing further includes a u-shaped channel affixed to the housing coupling.

2. (Original) The system of claim 1, wherein the at least one set of support brackets is welded to the base.

3. (Original) The system of claim 1, wherein the at least one set of support brackets each include:

a thru-hole; and

a fastener, positioned proximate the thru-hole.

4. (Original) The system of claim 3, wherein the connector includes a pair of flared handles and a threaded portion for engaging the thru-hole of the one set of support brackets and threadedly securing to the fastener.

5. (Original) The system of claim 1, wherein the base includes a threaded aperture.

6. (Previously Presented) The system of claim 1, wherein the coupling is welded to the shaft.

7. (Original) The system of claim 1, wherein the rod is threaded.

8. (Canceled)

9. (Previously Presented) The system of claim 1, wherein the housing further includes a metal u-shaped channel affixed to the housing coupling.

10. (Previously Presented) The system of claim 1, wherein the housing coupling is threaded and is welded to the channel.

11. (Canceled)

12. (Previously Presented) The system of claim 1, further comprising means for securing the second end of the rod to the housing coupling.

13. (Previously Presented) The system of claim 1, further comprising a second support member coupled to the housing, wherein the second support member also includes a shaft having a coupling joined thereto.

14-39. (Canceled)

40. (Previously Presented) A base, comprising:

- an elongate body having a first end and a second end;

- a first set of support brackets positioned adjacent the first end and a second set of support brackets positioned adjacent the second end, wherein each set of support brackets includes a thru-hole;

- a threaded aperture in the elongate body between the first and second ends; and

- a base plate assembly, wherein the base plate assembly includes:

 - a base plate having a plurality of mounting slots for mounting a tool thereon;

 - a base coupling affixed to the base plate; and

 - a threaded segment for engaging a threaded aperture in the base.

41-45. (Canceled)
